Methodology

- **Scope.** SiteIntel Mode 1 (Public Passive) — 46 checks across DNS, TLS, headers, supply-chain, breach exposure, threat intel. No active testing or login attempts.
- **Corpus.** Public UK sites from FCA register, IMRG Top 500, ABPI member list, The Lawyer 200, Make UK members, Press Gazette Top 50. Anonymised at ingest (domain hashed, no identifying metadata persisted).
- **Score.** Composite 0-100; weighted across security, performance, SEO, accessibility, tech-debt.
- **Composite signals.** Pairs of finding codes with $\geq 5\%$ co-occurrence (support) and $\geq 1.5\times$ score-drop lift versus sector baseline. Information-severity findings excluded.
- **Cohort floor.** Sectors with < 5 scans excluded from percentile reporting.
- **Refresh.** Aggregate cached 1 hour; corpus grows continuously as new scans land.
- **Identification.** No individual sites named in this report. Cohort sizes published; underlying scan IDs and domain hashes are not.
